

## How to Protect Farm Employees During an FMD Outbreak

Company name:

Facility location:

Employee signature:

Supervisor or trainer signature:

Time of the day:

Date:

These procedures recommend minimum steps for employee protection while working with at-risk or potentially infected livestock. Alternative procedures achieving this objective may be used as required under specific circumstances.

All employees must follow good manufacturing practices, good agricultural practices, and the company-established personnel hygiene and safety program as they relate to personal protective equipment (PPE), biosecurity, and cleaning and disinfection (C&D) protocols.
